

WHERE TO USE?

Use all around the garden

Our peat free organic blend top soil is ideal for new beds and borders, replacing old soil, levelling lawns and making compost. It has been created using solely organic ingredients including green compost and a fertile loam which is great for promoting healthy root growth.

We strongly recommend using Levington Ericaceous compost for acid loving plants like Azaleas, Rhododendrons or Heathers.

Making Composts

Due to its high organic matter content, this top quality soil is ideal for mixing with base dressings to make a loam-based compost. To enrich it add Miracle-Gro® Continuous Release Plant Food granules at the rate of 25g per 10 litres of soil. For alpines and other plants that need increased drainage, add 1 part coarse grit or washed sharp sand to 3 parts of Levington® Peat Free Organic Blend Top Soil.

Levelling Lawns

Use Levington® Peat Free Organic Blend Top Soil to produce a clean, level surface before sowing grass seed or laying turf or for filling in hollows in established lawns.

Beds and Borders

Water the plant thoroughly. Dig a hole twice the size of the root ball. Part fill the hole with a mixture of 50% soil and 50% compost. Ensure the plant is at the same level as in the original pot. Fill in firmly, then water.

Containers

In windy positions, a loam-based compost will provide the weight needed to help keep patio pots and containers upright.

Replacing Sick Soil

Soil in greenhouses that has developed a build-up of pests and diseases or soil that has grown roses or strawberries for a number of years may need replacing if new plants are to establish. Use Levington® Peat Free Organic Blend Top Soil to introduce a fresh, fertile soil in which plants can thrive.

HOW TO USE?

Instructions for use

Use straight from the bag to add to beds, borders and lawn, it's as easy as that. Mix with other materials to make compost for filling pots and containers. Keep the compost moist and do not let it dry out. Do not leave plants standing in water.

Storage instructions

- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Keep away from pesticides.
- Occasionally a white mould appears on the compost. This is not harmful to your plants and should disappear naturally.

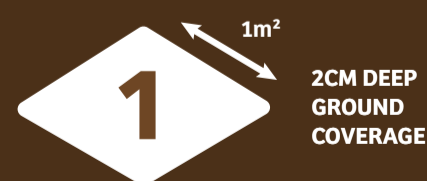

Health and safety advice

- Use in a well ventilated place and avoid breathing in dust.
- Always wear gloves when gardening.
- Wash hands after use.
- Store in a cool place, away from sun.
- Open bag carefully and reseal after use.

OUR STORY...

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

WHAT IS IT?

Organic blend top soil

Rich fertile loam-based soil that **promotes healthy root growth**. The different-sized particles leave spaces in the soil for air and water to flow and roots to penetrate feeding on the natural occurring organic nutrients.

Optimum **drainage** system prevents excess moisture.

Levington® Peat Free Organic Blend Top Soil has a **high content of organic matter**. The top soil is great for making raised beds where existing soil is poor or for replacing soil that is tired or unsuitable for the re-planting of related plants. Plus, it can be used as a component of soil/loam based composts.

Partnering with industry pioneers we are turning 25,000 tonnes of green garden waste into high quality compost every year. Stringent tests ensure that you can **grow plants that improve your environment** and make the world a more beautiful place.

SUSTAINABILITY

PEAT FREE

WE ARE DEDICATED TO PROTECTING THE ENVIRONMENT AND THIS COMPOST IS NOW 100% PEAT FREE

RESPONSIBLE SOURCING

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.
