

Essentials Top Soil by Levington

Levington Essentials Top Soil is a rich, fertile loam-based soil. It's a **sustainable, rich source of nutrients** that supports growth for flowers & fruits. Ideal for making raised beds where existing soil is

poor or for replacing soil that is tired or unsuitable for the re-planting of related plants. It can be used as a component of soil/loam based type composts.

Perfect for new beds and borders, replacing old soil, levelling lawns and making compost. Works well for Young Plants and Grown Plants. It's also children and pet friendly.

We strongly recommend using Levington John Innes Ericaceous compost for acid loving plants like Azaleas, Rhododendrons or Heathers.

How to use

Use straight from the bag, it's as easy as that. When filling or potting, firm lightly. Keep the compost moist and do not let it dry out. Do not leave plants standing in water.

How to use

Keep the bag closed when in storage to prevent drying out. Storage from one year to another may affect performance. Keep away from pesticides. Occasionally a white mould appears on the compost. **This is not harmful** to your plants and should disappear naturally.

Health & Safety Advice

- Use in a well ventilated place and avoid breathing in dust.
- Always wear gloves when gardening
- Wash hands after use.
- Store in a cool place, away from sun.
- Open bag carefully and reseal after use.

Beds & Borders

Use Levington Essentials Top Soil straight from the bag to build up beds and borders. Dig in this fertile blend to enrich your tired existing soil with its high organic matter content. No lime has been added to Levington Essentials Top Soil and it is suitable for improving the soil around Rhododendrons, Azaleas, Heathers and other ericaceous plants.

Replacing Sick Soil

Soil in greenhouses that has developed a build-up of pests and diseases or soil that has grown roses or strawberries for a number of years may need replacing if new plants are to establish. Use Levington Essentials Top Soil to introduce a fresh, fertile soil in which plants can thrive.

Levelling Lawns

Use Levington Essentials Top Soil to produce a clean, level surface before sowing grass seed or laying turf or for filling in hollows in established lawns.

Making Compost

Due to its high organic matter content, this top quality soil is ideal for mixing with base dressings to make a loam-based compost. To enrich it add Miracle-Gro Slow Release Plant Food granules at the rate of 25g per 10 litres of soil. For alpiners and other plants that need increased drainage, add 1 part coarse grit or washed sharp sand to 3 parts of Levington Essentials Top Soil.

How much Peat is in this compost?

We are actively involved in helping the management and restoration of the peat land areas that we harvest from.*

Our Commitment to Sustainability

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.
