

Bark by Levington

Our bark has excellent moisture retaining properties. It is ideal for decorative purposes and low maintenance gardening. It works in three ways to reduce water loss.

- Reduces evaporation from soil surface
- Provides an insulating layer which protects the soil from hot, dry weather
- Reduces weed growth so stops weeds taking valuable moisture from your plants

An entirely natural by-product of the Timber Industry.

Levington Essentials Bark is graded for ease of use, its fresh and natural pine aroma making it pleasant to handle.

- Water retaining mulch
- Helps suppress weeds
- Ideal for Flowerbeds, Borders and Paths

How to use

- Remove all weeds from the bed or border.
- Apply when the soil is moist.
- Spread a layer of Levington Essentials Bark 5cm (2 inches) deep around plants.

Storage Instructions

Keep the bag closed when in storage to prevent drying out. Storage from one year to another may affect performance. Keep away from pesticides. Occasionally a white mould appears on the compost. **This is not harmful** to your plants and should disappear naturally.

Health & Safety Advice

- Use in a well ventilated place and avoid breathing in dust.
- Always wear gloves when gardening
- Wash hands after use.
- Store in a cool place, away from sun.
- Open bag carefully and reseal after use.

Pathways

Levington Essentials Bark is an attractive alternative to gravel for garden paths. It provides a stable surface and safe footing, even during rain. Spread a layer 5cm (2 inches) deep over the weed free surface. Covers an area 1m x 1m at 5cm deep.

Our Commitment to Sustainability

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.
