

Roundup® NL Weed Control is a Super Concentrate product which is broken down naturally in the soil. Roundup® NL Weed Control is a home garden weedkiller for use as a herbicide for the control of a broad range of annual garden weeds.

RISK AND SAFETY INFORMATION

WARNING

Cause skin irritation. Causes serious eye irritation. Harmful to aquatic life with long lasting effects.

TO AVOID RISKS TO HUMAN HEALTH AND THE ENVIRONMENT, COMPLY WITH THE INSTRUCTIONS FOR USE.

Please read label before use. Do not eat, drink or smoke when using this product. Keep out of reach of children. If medical advice is needed, have product container or label at hand. Wash hands thoroughly after use. Wear protective gloves/eye protection. IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical attention. Take off contaminated clothing and wash before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove

contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/care. Do not contaminate water with the product or its container. For the UK only: Dispose of contents/container to a household waste recycling centre as hazardous waste except for empty containers which can be disposed of in the dustbin. Contact your local council for details. For RoI only: Dispose of contents/container to a licensed waste disposal contractor or collection site, except for triple rinsed empty containers, which can be disposed of by recycling or in the dustbin. Contact your local council for details. MAPP No. 19239 PCS No. 06392

SAFETY INSTRUCTIONS

Protection during/in use:

IN CASE OF CONTACT WITH EYES, RINSE IMMEDIATELY with plenty of water and seek medical advice. WASH OFF SPLASHES IMMEDIATELY. DO NOT BREATHE SPRAY. WASH HANDS AND EXPOSED SKIN AFTER USE.

Environmental protection:

Do not empty into drains. To protect aquatic organisms and non-target plants do not apply on impermeable hard surfaces such as asphalt, concrete, cobblestones, tarmac, paving, patio and other situations with a high risk of run-off. Direct spray away from ponds and other surface water bodies.

Storage and disposal:

KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed, in a safe place. KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDING STUFFS. KEEP PRODUCT AWAY FROM CHILDREN AND PETS. Dispose of empty container in the dustbin. Do not-reuse empty bottle for any other purposes. PROTECT FROM FROST.

This product is a home garden weedkiller for use as a herbicide for the control of a range of annual weeds. Contains 565.49 g/l Parglionic acid as an Emulsifiable Concentrate (EC) formulation.

INSTRUCTIONS FOR USE

Roundup® NL Weed Control can be used to kill a broad range of garden weeds including: clover, chickweed, common groundsel, black nightshade, sowthistle, black medick, annual meadow-grass and mayweeds.

When to use

- Use in April to November when the weeds are actively growing and have adequate leaf area to absorb the spray.
- After 3 hours, product will not be washed away by rain. Reduces the need for repeat treatment.
- Repeat treatment if necessary after a minimum of 7 days for larger weeds or where re-growth occurs.
- For deep rooted annual weeds such as black bindweed use Roundup® glyphosate based product.
- For best results apply in warm, dry conditions when weeds are young and actively growing, usually during spring or early summer. Do not apply when there is a risk of frost as weeds will not be actively growing.
- It is most effective on young weeds smaller than 10 cm.
- Maximum number of treatments: 4 per year.
- Use the mixture immediately or soon after mixing. If left standing for more than 30 minutes shake the sprayer before using.

Where to use

- For the control of weeds around ornamental garden plants, trees and areas not intended to bear vegetation.
- Suitable to use on gravel paths and drives and along fences.
- Can be used to clean up weedy ground before planting vegetables, flowers, bushes and trees, and to renovate overgrown areas.
- Should be applied on a calm, dry day when there is no risk of spray drift onto adjacent desirable plants. Do not direct spray or allow spray drift onto cultivated plants and lawn as Roundup® NL Weed Control destroys all green plant parts.
- Treated areas can be re-planted or re-seeded after 3 days.

INSTRUCTIONS FOR USE

How to use

- Although not a requirement, as good practice, we recommend wearing waterproof gloves and gardening footwear.
- Work out the amount of spray solution needed by using the table included.
- Fill the sprayer with clean water to about 50% of the needed solution.
- Add the measured amount of concentrate (use the measuring cap).
- Shake gently and add clean water to the total amount needed.
- Close the sprayer; put it under pressure; direct the nozzle to the target weeds and spray.
- When spraying large areas it is easier to mark out and measure the area before application.
- Spray the weeds evenly, ensuring a good coverage of the leaves.
- For use in a pressure sprayer only.

ROUNDUP Super Concentrate to be added to: Sprayer - 0.5 litre of water	Area Treated	When to treat
Annual weeds	25 ml	11 m ²
		When actively growing, usually April - November

- Treat annual weeds before the start of flowering to give best results.
- Weeds may show first effects within 3 hours of spraying, depending on the weather and the type of weed.

*No Glyphosate claim is provided to help distinguish from other formulas that may contain glyphosate.
