

Miracle-Gro®

PERFORMANCE ORGANICS™

Organic Lawn Food

Performance Organics from Miracle-Gro is the breakthrough range of 100% natural gardening products that still grows twice as big, but organically.

Never again having to compromise on efficacy, you will not only be proud of your lawn but also how you care for it.

WHY USE ?

Miracle-Gro Performance Organics Lawn Food is a high performance 100% natural and organic food for your lawn which is **glorious on lawns but also gentle on nature!**

Nutrients release quickly enabling the lawn to green quickly

Nutrients release slowly over 3 months

*Healthier lawns means less space for weeds & moss to grow

HOW TO USE

Application rate is 25g/m² for regular maintenance or, for lawns that need a bit of extra care, we recommend using up to 75g/m². For a visual guide to the correct application rate, first spread the recommended amount over a small measured area. Using your hand, apply half of the product in one direction and the other half in the other direction (criss cross pattern) to get an even coverage.

This pack treats 360m² (18m x 20m). To determine the size of your lawn multiply the length by the width in metres. Alternatively a lawn with 10 by 11 standard fence panels (1.82m width), will cover approx 360m². To apply with a spreader, see our website for recommended spreader settings. Re apply after 3 months.

WHEN TO USE

Use in March - September when the grass is dry and frost free but the soil is moist.

STORAGE & ADVICE

- Children and pets need not be kept out of the treated area once it has been watered in and dried.
- Wash hands after use.
- Reseal pack after opening.
- We recommend you always wear gloves when gardening.
- Store in a dry place.

ALWAYS USE GLOVES

HINTS & TIPS

Mowing
Regular mowing will help to create a lush green lawn. You can feed your lawn with Performance Organics Lawn Food directly after mowing!

Watering
Make sure you give your grass a good drink after application. Additional regular watering helps maintain a green lawn and is vital during dry periods.

Scarifying
Rake your lawn in spring to help remove the moss. Follow this process by feeding with Performance Organics Lawn Food. It will encourage regeneration so the lawn will be dense and green again ready for summer.
