

# ROUNDUP® FAST ACTION PATH & DRIVE Weedkiller

## Ready to Use Weedkiller

### THIS PRODUCT IS A HOME GARDEN WEEDKILLER FOR USE ON UNWANTED VEGETATION

ROUNDUP® FAST ACTION PATH & DRIVE Weedkiller is absorbed by leaves and moves through the entire plant, above and below ground, to destroy weeds growing through all hard surfaces including drives, patios, paths, tarmac, gravel and paving. It is inactivated on contact with the soil and is then broken down by soil micro-organisms, to allow replanting.

### Instructions for Use

#### Refill for Use with Garden Sprayers

Refill – to refill remove the pump mechanism by unscrewing in an anti clockwise direction.

Remove the tamper-evident closure on the refill pack. After use – replace the lid of the refill for the next use.

Follow the instructions on the Pump 'N Go sprayer or those supplied by the manufacturer of your garden Sprayer. Pour the required content of the refill pack into your clean empty Pump 'N Go sprayer or a dedicated weedkiller sprayer.

Rotate nozzle to 'spray' or 'stream'. Hold the sprayer approximately 50 cm away from the target weed and spray to lightly wet the weeds – avoid run-off. Rotate nozzle to 'stop' after use.

### When to use

- Spray at any time when the weeds are actively growing and have adequate leaf area to absorb the spray.
- Treat established perennial weeds at the start of flowering to give best results.
- Rain within 6 hours of spraying reduces effectiveness and repeat treatment may be necessary.
- Apply in calm conditions to avoid drift onto cultivated plants.
- Spray nettles and ground elder when new leaves have unfolded fully in late spring.

### Where to use

- Controls most weeds on paths, drives, patio's, paving and gravel areas.
- Do not treat near drains, wells or water courses and avoid run off.
- Do not use on lawns or other wanted plants, unless you want to kill them.

### Restrictions

- Avoid contact by spray and spray drift with cultivated plants and desired vegetation
- To avoid transfer to lawns and other desired vegetation do not walk into treated areas until the product has dried
- Keep children & pets out of treated areas until the product has dried.

### WHAT TO EXPECT

- Weeds may show first effects from a few days up to 4 weeks, depending on the weather and the type of weed.

- Where weeds are to be removed, allow 7 days after spraying before digging or soil cultivation, to allow time for the weedkiller to move to the roots.

- Repeat application if necessary, should new growth appear.

Keep children and pets away from treated areas until spray has dried

### RISK & SAFETY INFORMATION

Read label before use • Keep out of reach of children • Keep product away from food and drink • If medical advice is needed, have product container or label at hand • Keep product in original container • Dispose of contents/container to a household waste recycling centre as hazardous waste except for empty containers which can be disposed of by recycling. Contact your local council for details. **To avoid risks to human health and the environment, comply with the instructions for use - MAPP 18676**
