

To protect your crops and prevent the spread of slugs, form the slug barrier when planting or in early spring.

SlugClear™ Slug & Snail Barrier is also an excellent conditioner for your soil: incorporated into the soil at the end of the season, it aerates and drains the soil.

Keep in original container, tightly closed in a safe place.

For Batch Number and Expiry Date, see bottom of the pack.

SlugClear™ Slug & Snail Barrier forms a physical and natural obstacle for slugs and snails to protect vegetables and plants.

The product forms a natural barrier which repels slugs and snails without killing them. It protects vegetables, fruit & flowers and is resistant to rain. The angular and sharp lava granules help to prevent invasions.

It is perfect for planting out green salads, herbs like basil, parsley or dill, all cabbage plants, spinach, celery, courgettes and peppers. Also great for protecting flowering annuals such as marigolds, petunias & zinnias or perennial plants like delphiniums, asters, dahlia, lupins and hostas. Do not forget to protect strawberries when they are bearing fruits.

INSTRUCTION FOR USE

Apply SlugClear™ Slug & Snail Barrier around each plant or vegetable patch: vegetables, strawberries and ornamentals.

WHEN TO USE

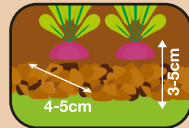

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

Use SlugClear™ Slug & Snail Barrier during the slug season when planting out plants or when the first signs of slug or snail damage is visible on plants.

HOW TO USE

1. Remove weeds from around the plants. Check if there are any snails or slugs on the plants or next to the plants.

2. Create a barrier of product around your crop. The barrier should be 4-5 cm wide and 3-5 cm high.

3. Make sure that there are no gaps for the slugs and snails to crawl through.
