

Miracle-Gro® Professional Super Seed
The ultimate 3IN1 blend of Seed, Feed and Soil Enricher to give you a drought tolerant lawn

ROOTED
IN SCIENCE

REGENERATING THICKER DENSER

Miracle-Gro® Super Seed contains a specially selected variety of perennial ryegrass that regenerates and spreads by itself to create a thicker, denser lawn (RPR Technology, Regenerating Perennial Ryegrass)

TOUGH USE

Multipurpose, hard wearing grass seed for a lawn that copes with lots of activity for you to enjoy with family, friends and pets.

EARLY GERMINATION

Can be applied to lawns from March to October, once the risk of frost has passed and soil temperatures are 6°C or above. Unlike most grass seeds, Super Seed works with temperature as low as 6°C so you can get started earlier in season

CONTROL RELEASE FEED

High nitrogen lawn feed to encourage young seedling growth for a thicker, greener lawn. With added calcium to help rebalance the soil pH and neutralise pet urine burns on lawns.

INSTRUCTIONS FOR USE

Rake
Rake the area to remove all weeds, stones or dead grass. If over-seeding ensure you mow the grass short first. Lightly cover the area with Miracle-Gro® Lawn Dressing. Level and firm by treading the soil.

Shake
Shake the box to mix the seeds. If over-seeding apply 30g/m² (approx a handful) and for new lawns or bare patches 52g/m². Using the handy sprinkler on the side of pack, create a criss-cross pattern by sowing half the seed from left to right and the rest from top to bottom. Gently rake in and tread the seeds into the soil.

Water
Soak with a fine spray and keep soil moist for the next few weeks.

When will I see the results?
In ideal conditions when the soil is moist, grass will start to appear from 9 days. In less favourable conditions allow 10-14 days.

How much will I need?
This pack will overseed an existing lawn of approx 200m² or create a new lawn of approx 115m².
To determine the size of your lawn multiply the length by the width in metres. Alternatively a lawn with 8 by 8 standard fence panels (1.82m width) will cover approx 200m².

See side of pack for spreader settings.

Mowing
The grass can be trimmed when 5-8cm.
Each time you mow, lower blade height a level until it's at 2.5cm. Do not cut more than 1/3 off the growth at any one time.

Children and pets
It's fine to use this product in gardens with children and pets, but little feet can damage developing seeds, so it's best to keep them off the treated areas until the grass has established.

THE 'SUPER' SEED

Miracle-Gro® Super Seed contains a specially selected variety of perennial ryegrass that regenerates and spreads by itself to create a thicker, denser lawn (RPR Technology, Regenerating Perennial Ryegrass).

RPR technology is widely used by professional sports fields. Determinate stolons, sometimes called "runners," are growth shoots emerging from auxiliary buds at the base of each plant. When an RPR plant gets room, e.g., when turf is damaged, determinate stolons will grow horizontally into the empty area and develop roots at its internodes.
