

WHERE TO USE?

Use for all types of re-potting

Our John Innes No.2 compost is ideal for re-potting plants. It has been specially developed, with a unique combination of 14 vital minerals for maintaining plants growth and health. With its traditional mix of loam and grit, it provides the perfect structure for your plants roots.

We strongly recommend using Levington Ericaceous compost for acid loving plants like Azaleas, Rhododendrons or Heathers.

Potting-on plants

Re-potting is best done in the spring, when plants are actively growing. Before re-potting, water plants well and allow to drain. Put fresh compost in the bottom of a new pot. Turn the old plant upside down and tap the pot sharply to release. Place the plant in the middle of the new pot and add more compost, firming lightly around the root-ball.

Leave a space of at least 1cm below the pot rim to allow adequate space for watering. Water the plant well.

Growing on

After 6 weeks feed with Miracle-Gro® Plant Food, or re-pot into Levington John Innes No.3 compost.

LEVINGTON PEAT FREE JOHN INNES COMPOST RANGE

Stages of growth

SEED COMPOST with added John Innes

Perfect for all seedlings.

JOHN INNES NO.1

Perfect for all young plants and rooting cuttings.

Perfect for re-potting.

JOHN INNES NO.3

Perfect for final re-potting of mature plants.

ERICACEOUS COMPOST with added John Innes

Perfect for acid loving plants like Azaleas, Heathers & Rhododendrons.

HOW TO USE?

Instructions for use

Use straight from the bag, it's as easy as that. When filling or potting, firm lightly. Keep the compost moist and do not let it dry out. Do not leave plants standing in water. Storing from one year to another may result in the fertiliser ratios becoming unbalanced.

Storage instructions

- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Keep away from pesticides.
- Occasionally a white mould appears on the compost. This is not harmful to your plants and should disappear naturally.

Health and safety advice

- Use in a well ventilated place and avoid breathing in dust.
- Always wear gloves when gardening.
- Wash hands after use.
- Store in a cool place, away from sun.
- Open bag carefully and reseal after use.

OUR STORY...

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

WHAT IS IT?

What is John Innes?

John Innes composts were developed in the 1930's. They are based on a traditional mixture of loam and sand or grit. Our unique peat free formulation has been checked and approved by the John Innes Manufacturers Association.

John Innes No.2 Compost

Levington Peat Free John Innes No.2 compost is a special, **traditional mix** with loam and grit that secures an open texture for the **roots** to **develop** and excess **moisture** to **drain** freely.

Optimum **drainage** system prevents excess moisture.

Our patented wood fibre is infused with organic nitrogen, meaning more is available for the plant, as well as ensuring the optimum balance of air and water for the roots to grow strong and healthy.

Levington Peat Free John Innes No.2 compost is specially balanced with 14 vital minerals and provides 6 weeks of plant feed, to give your plants a great start.
