

WHERE TO USE?

Use for all types of young plants

Our John Innes No.1 compost is ideal for all young plants. It has been specially developed, with a unique combination of 14 vital minerals for maintaining plants growth and health. With its traditional mix of loam and grit, it is a great start for your plants.

We strongly recommend using Levington Ericaceous compost for acid loving plants like Azaleas, Rhododendrons or Heathers.

Pricking out seedlings

Loosely fill the tray or pot with compost and level. Use a dibber or small fork to loosen the compost beneath the seedling. Holding the seedling by a seed leaf, ease the seedling out of its compost keeping as much of the original compost sticking to the roots as possible.

Make a hole in the new compost and place the roots of the seedling in the hole. Gently firm the compost around the plant, spacing out the seedlings evenly. Water gently with a fine rose to settle the compost around the roots. Keep in a warm, shaded spot protected from frost.

Potting-on rooted cuttings

Add a layer of compost to the bottom of the new pots or tray cells. Position the rooted cutting into the pot and top up with fresh compost around the roots. Water gently and keep in a warm, shaded spot protected from frost.

Growing on

After 6 weeks feed with Miracle-Gro® Plant Food, or re-pot into Levington John Innes No.2 compost.

LEVINGTON PEAT FREE JOHN INNES COMPOST RANGE

Stages of growth

SEED COMPOST with added John Innes

Perfect for all seedlings.

JOHN INNES NO.1

Perfect for all young plants and rooting cuttings.

JOHN INNES NO.2

Perfect for re-potting.

JOHN INNES NO.3

Perfect for final re-potting of mature plants.

ERICACEOUS COMPOST with added John Innes

Perfect for acid loving plants like Azaleas, Heathers & Rhododendrons.

HOW TO USE?

Instructions for use

Use straight from the bag, it's as easy as that. When filling or potting, firm lightly. Keep the compost moist and do not let it dry out. Do not leave plants standing in water. Storing from one year to another may result in the fertiliser ratios becoming unbalanced.

Storage instructions

- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Keep away from pesticides.
- Occasionally a white mould appears on the compost. This is not harmful to your plants and should disappear naturally.

Health and safety advice

- Use in a well ventilated place and avoid breathing in dust.
- Always wear gloves when gardening.
- Wash hands after use.
- Store in a cool place, away from sun.
- Open bag carefully and reseal after use.

OUR STORY...

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

WHAT IS IT?

What is John Innes?

John Innes composts were developed in the 1930's. They are based on a traditional mixture of loam and sand or grit. Our unique peat free formulation has been checked and approved by the John Innes Manufacturers Association.

John Innes No.1 Compost

Levington Peat Free John Innes No.1 compost is a special, **traditional mix** with loam and grit that secures an open texture for the **roots** to **develop** and excess **moisture** to **drain** freely.

Optimum **drainage** system prevents excess moisture.

Our patented wood fibre is infused with organic nitrogen, meaning more is available for the plant, as well as ensuring the optimum balance of air and water for the roots to grow strong and healthy.

Levington Peat Free John Innes No.1 compost is specially balanced with 14 vital minerals and provides 6 weeks of plant feed, to give your plants a great start.

SUSTAINABILITY

PEAT FREE

WE ARE DEDICATED TO PROTECTING THE ENVIRONMENT AND THIS COMPOST IS NOW 100% PEAT FREE

RESPONSIBLE SOURCING

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.

TIPS

"Re-use your compost bag as a liner in your hanging basket, just pierce several holes to ensure drainage."

"Split the compost bag open, and re-use it as a weed barrier in your flower beds."
