

WHY USE BARK?

Our decorative bed and border bark has excellent moisture retaining properties, ideal for decorative purposes and low maintenance gardening. It is an entirely natural by-product of the UK timber industry and the bark has a fresh natural pine aroma making it very pleasant to handle.

Using bark is an excellent way to reduce water loss in the garden. It reduces evaporation from the soil surface and keeps moisture around the plant roots, reducing the need for watering.

Bark helps to suppress weeds, provides insulation to protect roots from very hot or cold weather, and is a hostile environment for pests.

HOW TO USE

You can use our decorative bed & border bark all around the garden. It's ideal as a decorative top layer for beds and borders.

Bark helps suppress weeds, so it is perfect for low maintenance gardening.

BEDS AND BORDERS

1. Remove all weeds from the bed or border.
2. Ensure the soil is moist around the plants, by watering if necessary, prior to application. This will help aid moisture retention around the plants.
3. Spread a layer of Levington® Decorative Bed & Border Bark at 5 cm (2") deep around the plants.
4. For healthy and beautiful plants in your beds and borders, we recommend **Levington® Soil Conditioner** when planting, and adding a Levington® soil supplement such as **Levington® Chicken Manure** to enrich the soil.

POTS, CONTAINERS AND WINDOW BOXES

Creates a smart finish to your pots and containers.

1. Remove all weeds from the area.
2. Ensure the soil is moist around the plants, by watering if necessary, prior to application. This will help aid moisture retention around the plants.
3. Spread a layer at 2.5 cm (1") around the plants.

PATHWAYS

Levington® Decorative Bed & Border Bark is an attractive natural alternative to gravel for garden paths. It provides a stable surface and safe footing, even during rain.

1. Remove all weeds from the path area.
2. Spread a layer at 5 cm (2") deep over the weed-free surface.

Covers an area 1.5m x 1m at 5 cm depth.

HEALTH, SAFETY & STORAGE ADVICE

- Use in a well ventilated place and avoid breathing in dust.
- Wash hands after use.
- Open bag carefully and reseal after use.
- Store in a cool place, away from direct sunlight.
- Sometimes you might see some white mould on your bark. This is not harmful to your plants and will disappear naturally.
- Keep away from pesticides.

ALWAYS WEAR GLOVES

HOW IT WORKS

Our bark **reduces weed growth** by preventing annual weeds from growing and new weed seeds from germinating.

Using bark is an excellent way to reduce water loss:

- Reduces evaporation from the soil surface.
- Keeps moisture around plant roots where they need it.

Adds a smart finish. Our Levington® Decorative Bed & Border Bark is perfect for finishing the look on pots, containers and around the garden.

HOW MUCH BARK IS IN THE BAG

OUR STORY

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

SUSTAINABILITY

Our bark is sustainably sourced and FSC mix certified from UK forests.
