

**SEED & CUTTING COMPOST**  
with added John Innes  
Perfect for all seeds.

**JOHN INNES NO.1**  
Perfect for all young plants  
and rooting cuttings.

**JOHN INNES NO.2**  
Perfect for re-potting.

**JOHN INNES NO.3**  
Perfect for final re-potting of  
mature plants.

**ERICACEOUS COMPOST**  
with added John Innes  
Perfect for acid loving plants like  
Azaleas, Heathers & Rhododendrons.

## HOW TO USE

The unique peat free formulation of our Ericaceous Compost with added John Innes is ideal for potting of acid loving plants like Azaleas, Rhododendrons or Heathers. Use straight from the bag, it's as easy as that.

## POTTING-ON PLANTS

Re-potting is best done in the spring, when plants are actively growing.

1. Before re-potting, water plants well and allow to drain.
2. Put fresh compost in the bottom of a new pot.
3. Turn the old plant upside down and tap the pot sharply to release.
4. Place the plant in the middle of the new pot and add more compost, firming lightly around the root-ball.
5. Leave a space of at least 1 cm below the pot rim to allow adequate space for watering.
6. Water the plant well using a fine rose.

## FEEDING

After 6 weeks feed with Levingon® Sulphate of Iron+.

## USEFUL TIPS

- Peat free will look and feel different. We recommend that you check before watering using the 'finger test'. Pop your finger about 3 cm into the compost. If it is dry, get watering, if not, wait a bit longer.
- Some plants are hungrier than others so may require feeding earlier. If leaves start to pale this is a sign to start feeding, and we recommend using an ericaceous plant food.
- Try to avoid compost in pots drying out, and don't let them sit in water either, roots don't like being waterlogged!
- Sometimes you might see some white mould on your compost. This is not harmful to your plants and will disappear naturally.

## HEALTH, SAFETY & STORAGE ADVICE

- Use in a well ventilated place and avoid breathing in dust.
- Wash hands after use.
- Open bag carefully and reseal after use.
- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Store in a cool place, away from direct sunlight.
- Keep away from pesticides.

## HOW IT WORKS

Our specially developed peat free formula for Levington® Ericaceous Compost with added John Innes contains a unique combination of 14 vital minerals for maintaining plants growth and health. With its traditional John Innes mix of loam and grit, it provides the perfect structure for your plants roots.

Specially formulated with a pH to create the ideal growing conditions for acid-loving plants. With the essential nutrients to ensure green leaves and vibrant blooms.

Contains an optimal balance of nitrogen, phosphate, potassium and trace elements to give your plants all the feed they need for 6 weeks.

The ideal mix for potting ericaceous plants. A unique mix of loam and grit secures an open texture for roots to develop. Excess moisture drains freely, ensuring the optimum balance of air and water for roots to grow strong and healthy.

## OUR STORY

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

## PEAT FREE

We are dedicated to protecting the environment and this compost is 100% peat free.

Working with peat free composts is different to peat composts, however you can still achieve fantastic results. Going peat free is better for the plants and the planet.

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington® compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.

We have helped restore 3000 hectares of peatland over the last 30 years, the equivalent of 5606 football pitches!
