

### SEED & CUTTING COMPOST with added John Innes

Perfect for all seeds.

### JOHN INNES NO.1

Perfect for all young plants and  
rooting cuttings.

### JOHN INNES NO.2

Perfect for re-potting.

### JOHN INNES NO.3

Perfect for final re-potting of  
mature plants.

### ERICACEOUS COMPOST with added John Innes

Perfect for acid loving plants like  
Azaleas, Heathers & Rhododendrons.

## HOW TO USE

Our John Innes No.3 compost is ideal for  
final potting of plants. It has been specially  
developed, with a unique mix containing  
an optimal balance of nitrogen, phosphate,  
potassium and trace elements for maintaining  
plants growth and health.

With its traditional mix of loam and grit,  
it provides the perfect structure for your plants roots.  
Use straight from the bag, it's as easy as that. **We strongly  
recommend using Levington® Ericaceous Compost with  
added John Innes for acid loving plants like Azaleas,  
Rhododendrons or Heathers.**

## POTTING-ON PLANTS

Re-potting is best done in the spring,  
when plants are actively growing.

1. Before re-potting, water plants well  
and allow to drain.
2. Put fresh compost in the bottom of a  
new pot.
3. Turn the old plant upside down and tap  
the pot sharply to release.
4. Place the plant in the middle of the new pot and add  
more compost, firming lightly around the root-ball.
5. Leave a space of at least 1 cm below the pot rim to  
allow adequate space for watering.
6. Water the plant well using a fine rose.

## FEEDING

After 8 weeks feed with a liquid plant food such as  
Levington® Tomorite® Concentrated Tomato Food.

## USEFUL TIPS

- Peat free will look and feel different. We recommend  
that you check before watering using the 'finger test'.  
Pop your finger about 3 cm into the compost. If it is dry,  
get watering, if not, wait a bit longer.
- Some plants are hungrier than others so may require  
feeding earlier. If leaves start to pale this is a sign to  
start feeding, and we recommend using a balanced  
liquid plant food.
- Try to avoid compost in pots drying out, and don't let  
them sit in water either, roots don't like being  
waterlogged!
- Sometimes you might see some white mould on your  
compost. This is not harmful to your plants and will  
disappear naturally.

## HEALTH, SAFETY & STORAGE ADVICE

- Use in a well ventilated place and  
avoid breathing in dust.
- Wash hands after use.
- Open bag carefully and reseal  
after use.
- Keep the bag closed when in  
storage to prevent drying out.
- Storage from one year to another may affect  
performance.
- Store in a cool place, away from direct sunlight.
- Keep away from pesticides.

## HOW IT WORKS

John Innes composts are based on a traditional mixture of  
loam and sand or grit. Our unique peat free formulation  
has been checked and approved by the John Innes  
Manufacturers Association.

Plants will flourish with our  
exclusive blend containing the  
optimal level of nitrogen and all  
essential nutrients. This helps  
plants to flourish, supporting strong  
root development, beautiful foliage  
and colourful blooms.

Contains an optimal balance of  
nitrogen, phosphate, potassium  
and trace elements to give your  
plants all the feed they need for  
8 weeks.

A special, traditional mix with  
loam and grit that secures an open  
texture for the roots to develop and  
excess moisture to drain freely.

Optimum drainage  
system prevents  
excess moisture.

## HOW MUCH COMPOST IS IN THE BAG

**FILLS 10 SMALL  
1 LITRE POTS  
12 CM (5")**

**FILLS 2 MEDIUM  
5 LITRE POTS  
22 CM (9")**

## OUR STORY

**Established in 1967**, Levington has been  
providing expertise, research and innovation into  
compost for over 50 years. When it comes to compost,  
Levington has been the gardener's choice for decades.

At our officially recognised research  
station in Levington, Suffolk, we are  
constantly innovating and testing for  
the best combinations of ingredients in  
compost to ensure your plants are  
strong and healthy.

## PEAT FREE

**We are dedicated to protecting the environment and this  
compost is 100% peat free.**

Working with peat free composts is different to peat  
composts, however you can still achieve fantastic results.  
Going peat free is better for the plants and the planet.

We are actively working on improving the responsible  
sourcing profile of our compost mixes year on year.  
Levington® compost contains forest by-products, carefully  
processed to help you grow plants that improve your  
environment and make the world a more beautiful place.

We have helped restore **3000 hectares of peatland** over the  
last 30 years, the equivalent of 5606 football pitches!
