

HOW TO USE

This ready to use compost has been specially formulated to avoid the need to create your own mix. Use straight from the bag, it's as easy as that.

It has been specially developed, with a unique combination of 14 vital minerals for maintaining plants growth and health. With its unique mix of fibresmart woodfibre and composted bark it provides the perfect structure for your plants roots.

POTTING-ON PLANTS

Repotting is best done in the spring, when plants are actively growing.

1. Before repotting, water plants well and allow to drain.
2. Put fresh compost in the bottom of a larger pot.
3. To remove the plant, turn upside down, tap the bottom of the plant pot to help release the plant.
4. Gently rub the root ball to make it less compact and tease out the roots, this will make it easier for the plant to establish.
5. Place the plant in the middle of the new pot, add more compost, firm lightly around the plant and water thoroughly.

BEDS AND BORDERS

1. Dig a hole twice the size of the root ball.
2. Part fill the hole with equal quantities of compost and soil.
3. Make sure the plant is at the same level above the ground as in the original pot, firm lightly.

USEFUL TIPS

- Peat free will look and feel different. We recommend that you check before watering using the 'finger test'. Pop your finger about 3 cm into the compost. If it is dry, get watering, if not, wait a bit longer
- Some plants are hungrier than others so may require feeding earlier. If leaves start to pale this is a sign to start feeding, and we recommend using Miracle-Gro® Azalea, Camellia & Rhododendron Plant Food.
- Try to avoid compost in pots drying out, and don't let them sit in water either, roots don't like being waterlogged!
- Sometimes you might see some white mould on your compost. This is not harmful to your plants and will disappear naturally.

HEALTH, SAFETY & STORAGE ADVICE

- Use in a well ventilated place and avoid breathing in dust.
- Wash hands after use.
- Open bag carefully and reseal after use.
- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Store in a cool place, away from direct sunlight.
- Keep away from pesticides.

HOW IT WORKS

Special pH for acid loving plants with extra iron for glossy green leaves.

Optimum drainage system prevents excess moisture.

NITROGEN (N)	For greener leaves and healthy shoots
PHOSPHATE (P)	For strong root development
POTASSIUM (K)	For fruit and flowers
TRACE ELEMENTS	Essential for all round plant health and disease resistance
EXTRA IRON	For glossy green leaves

Our special wetting agent enables compost to soak and absorb higher levels of water without getting waterlogged.

HOW MUCH COMPOST IS IN THE BAG

50

FILLS 50 SMALL POTS
12 CM (5")

10

FILLS 10 MEDIUM POTS
22 CM (9")

5

FILLS 5 LARGE POTS
25 CM (10")

7

FILLS 7 HANGING BASKETS
30 CM (12")

OUR STORY

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

PEAT FREE

We are dedicated to protecting the environment and this compost is 100% peat free.

Working with peat free composts is different to peat composts, however you can still achieve fantastic results. Going peat free is better for the plants and the planet.

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington® compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.

We have helped restore 3000 hectares of peatland over the last 30 years, the equivalent of 5606 football pitches!
