

HOW TO USE

Our farmyard manure is made from specially selected natural material to provide a healthy, organic environment for all your plants. Use straight from the bag, it's as simple as that.

SOIL IMPROVEMENT

For general improvement, fork a 2.5 cm (1") layer of Levington® Farmyard Manure into the top 10 cm (4") of soil.

BEFORE SOWING/PLANTING

Fork in Levington® Farmyard Manure to the soil surface and to the bottom of planting holes, drills and trenches for an abundant crop of flowers, fruit and vegetables.

VEG PLOTS AND ALLOTMENTS

In spring, spread a 5 cm - 8 cm (2" - 3") deep layer of Levington® Farmyard Manure over the soil and dig in before sowing or planting. On heavy clay soils, repeat when winter digging.

ESTABLISHED BEDS AND BORDERS

Spread a 5 cm - 8 cm (2" - 3") layer of Levington® Farmyard Manure beneath the branches of roses, shrubs, trees and bushes. Allow a 5 cm - 8 cm (2" - 3") gap around stems. This 100% organic mulch will help the soil retain moisture, suppress weeds and release food to surrounding plants.

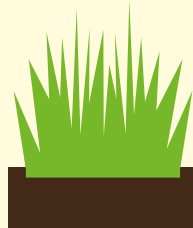

PLANT INVIGORATION

In spring, spread a 5 cm - 8 cm (2" - 3") deep layer of Levington® Farmyard Manure onto the clean soil around established herbaceous flowers, shrubs, fruit and vegetables, and work into the soil surface. It will add nutrients for better yields and vital plant development.

NEW LAWNS

Spread a 5 cm - 8 cm (2" - 3") deep layer of Levington® Farmyard Manure onto clean soil and dig into the top 10 cm - 15 cm (4" - 6") of soil for improved grass seed germination and quicker establishment of turf.

USEFUL TIPS

- Not suitable for use in pots and containers, for which we recommend using **Levington® Peat Free Multi Purpose Compost**.
- If leaves start to pale this is a sign to start feeding, and we recommend using Miracle-Gro® Plant Food.
- Sometimes you might see some white mould on your compost. This is not harmful to your plants and will disappear naturally.

HEALTH, SAFETY & STORAGE ADVICE

- Use in a well ventilated place and avoid breathing in dust.
- Wash hands after use.
- Open bag carefully and reseal after use.
- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Store in a cool place, away from direct sunlight.
- Keep away from pesticides.

HOW IT WORKS

Levington® Farmyard Manure is a **100% organic soil conditioner** blended with recycled plant material to enrich your soil with organic matter and nutrients. It can be dug in, used as a surface mulch or to improve soil quality when planting.

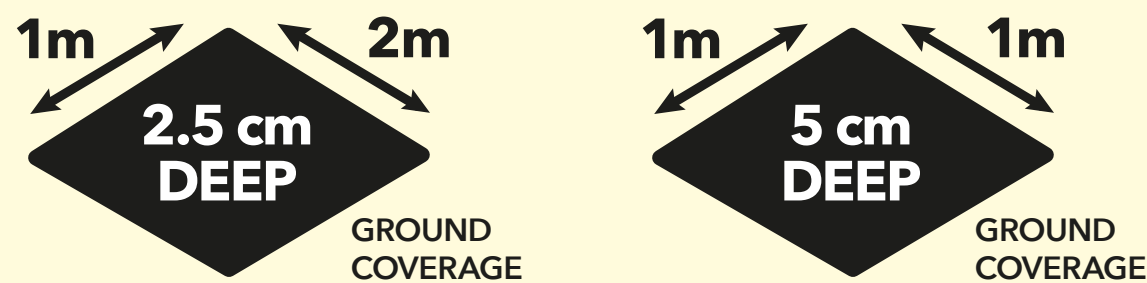

The humus and nutrients in our farmyard manure help to **improve soil structure**, therefore **increasing microbial activity** and invigorating the plants with nutrients.

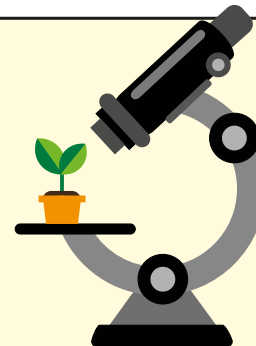

Adding farmyard manure to your existing soil will help to boost water retention, creating an improved structure that means you can water a little less often.

HOW MUCH MANURE IS IN THE BAG

OUR STORY

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

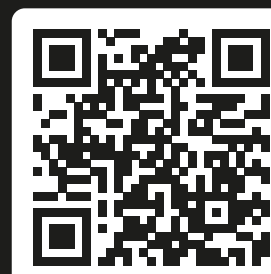

PEAT FREE

We are dedicated to protecting the environment and this compost is 100% peat free.

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington® compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.

We have helped restore **3000 hectares of peatland** over the last 30 years, the equivalent of 5606 football pitches!
