

HOW TO USE

- PLANTING** Shake the bag to distribute the contents. When only planting two plants use the end panels. Delay planting tomatoes until the first flower opens.
- WATERING** After planting, water in using about 4.5 litres (approx. 1 gallon), and then water as necessary to keep the bag moist.
- FEEDING** We recommend feeding with 20 ml of Tomorite diluted in 4.5 litres of water for most crops. Feed hungry plants such as tomatoes under glass once a week.
- SUPPORTING** Avoid piercing the bottom of the bag. Train plants to fan out so that they receive maximum light and air.

CROP	PLANTS PER BAG	START FEEDING WHEN
Tomatoes – under glass	3	The fruit on first truss is pea sized
Tomatoes – outdoor	3	The fruit on second truss is pea sized
Peppers & Aubergines	3	The fruit is the size of a golf ball
Melons (use 2 flaps left/right only)	2	The first fruit is swelling
Courgettes/Marrows/Cucumbers (use 2 flaps left/right only)	2	The first picking commences

Levington®

EST 1967

PEAT FREE

GRO-BAG

Unique combination of 14 vital nutrients: N, P, K and trace elements, essential for maintaining plant health.

FOLD FLAPS INSIDE BAG

Traditional formulation of composted materials and mineral fertilisers that increase the harvest.

Levington®

PEAT FREE

USEFUL TIPS

- Peat free will look and feel different. We recommend that you check before watering using the 'finger test'. Pop your finger about 3 cm into the compost. If it is dry, get watering, if not, wait a bit longer
- Some plants are hungrier than others so may require feeding earlier. If leaves start to pale this is a sign to start feeding, and we recommend using Levington® Tomorite® Plant Food.
- Try to avoid compost in pots drying out, and don't let them sit in water either, roots don't like being waterlogged!
- Sometimes you might see some white mould on your compost. This is not harmful to your plants and will disappear naturally.

HEALTH, SAFETY & STORAGE ADVICE

- Use in a well ventilated place and avoid breathing in dust.
- Wash hands after use.
- Open bag carefully.
- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Store in a cool place, away from direct sunlight.
- Keep away from pesticides.

THE ORIGINAL GRO-BAG

SINCE 1973

OUR STORY

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

PEAT FREE

We are dedicated to protecting the environment and this compost is 100% peat free.

Working with peat free composts is different to peat composts, however you can still achieve fantastic results. Going peat free is better for the plants and the planet.

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington® compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.

We have helped restore 3000 hectares of peatland over the last 30 years, the equivalent of 5606 football pitches!
