

HOW TO USE

This new Levington® Top Soil is a super fine, deep rich, fertile soil with sand. Use straight from the bag, it's as easy as that.

We strongly recommend using Levington® Ericaceous compost for acid loving plants like azaleas, rhododendrons or heathers.

USE ALL ROUND THE GARDEN

Our peat free top soil is ideal for new beds and borders, filling raised beds, replacing old soil in beds and borders, levelling lawns and for laying turf. It has been created using **solely organic ingredients** including green compost that is great for promoting healthy root growth.

BEDS AND BORDERS

Levington® Top Soil can be mixed into soil which lacks the nutrients for plants to thrive. The top soil will revitalise tired soil, promoting growth.

1. Remove any weeds.
2. Spread the top soil evenly over the soil surface to a depth of 5 cm (2") before planting.
3. When filling in your raised bed use Levington chicken manure pellets, a naturally nutritious all round garden feed.
4. After planting, water thoroughly.
5. Keep plants well-watered until they are established.

REPLACING SICK SOIL

Where plants have suffered from disease in soil Levington® Top Soil replaces the soil by introducing a fresh, fertile soil in which plants can thrive.

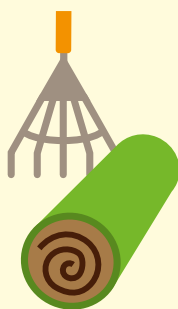

LEVELLING LAWNS/LAYING TURF

To make established lawns level, simply fill in any hollows. We recommend you apply a good quality lawn seed at the same time.

Before laying turf, apply Levington® Top Soil to the area to be turfed. Make sure the lawn is level. Water in well, especially near the joins to avoid the ends drying out.

We recommend when sowing grass seed or laying turf, to use a specially formulated **Lawn Dressing**.

USEFUL TIPS

- Some plants are hungrier than others so may require feeding earlier. If leaves start to pale this is a sign to start feeding, and we recommend using Miracle-Gro® Plant Food.
- Try to avoid plants drying out, and don't let them sit in water either, roots don't like being waterlogged!
- Sometimes you might see some white mould on your compost. This is not harmful to your plants and will disappear naturally.

HEALTH, SAFETY & STORAGE ADVICE

- Use in a well ventilated place and avoid breathing in dust.
- Wash hands after use.
- Open bag carefully and reseal after use.
- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Store in a cool place, away from direct sunlight.
- Keep away from pesticides.

HOW IT WORKS

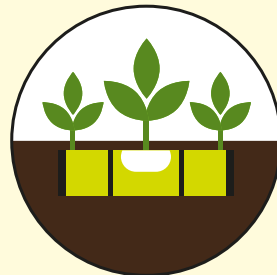

Our Top Soil is specially heat treated to be weed free.

Rich, fertile soil that **promotes healthy root growth**. The different-sized particles leave spaces in the soil for air and water to flow and roots to penetrate, feeding on the naturally occurring organic nutrients.

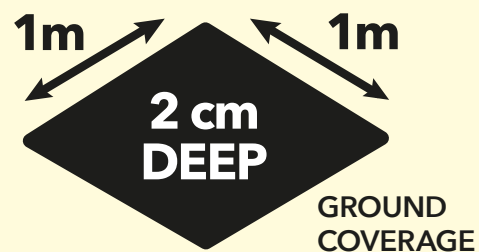

Optimum **drainage** system prevents excess moisture.

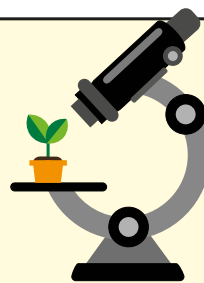

This top soil is ideal for levelling uneven beds and digging into existing soil to improve beds and borders.

HOW MUCH COMPOST IS IN THE BAG

OUR STORY

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

PEAT FREE

We are dedicated to protecting the environment and this compost is **100% peat free**.

Going peat free is better for the plants and the planet.

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington® compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.

We have helped restore **3000 hectares of peatland** over the last 30 years, the equivalent of 5606 football pitches!
