## HOW TO USE

### CONTAINERS & BASKETS

**ALWAYS WEAR GLOVES**

Place a layer of compost in the **base of the pot**.

Tap out the plant from the old pot, loosen the root ball and **place in the centre of the pot**.

Fill the space around the root ball, ensuring the compost level covers all the roots.

Firm lightly, **water thoroughly** and let drain.

### BEDS & BORDERS

Dig a hole **twice the size of the root ball**.

Position the plant and **fill with 50% soil and 50% compost** and firm around the base.

Water thoroughly.

## USEFUL TIPS

- Some plants are hungrier than others so may require feeding earlier. If leaves start to pale this is a sign to start feeding, and we recommend using a **Miracle-Gro® Plant Food**.
- Try to avoid compost in pots drying out, and don't let them sit in water either, roots don't like being waterlogged!
- Outdoor pots and containers might need more water in the summer, so always check first with the 'finger test' – pop your finger about 3 cm into the compost. If dry, get watering. If not, wait a bit longer.
- Sometimes you might see some white mould on your compost. **This is not harmful** to your plants and will disappear naturally.
- For all ericaceous (acid-loving) plants we strongly recommend using **Miracle-Gro® Peat Free Premium Azalea, Camellia, Rhododendron Ericaceous Plants Compost**.
