

ROUNDUP® Ultra

ROUNDUP® Ultra is a non-selective, translocated weedkiller that is absorbed by leaves and freshly cut, woody surfaces and moves throughout the entire plant, above and below ground, to control annual and perennial weeds, including grasses and deep rooted perennials weeds. It also controls standing trees, newly cut tree stumps, tree saplings, brambles, bracken, nettles, Japanese knotweed and other tough and woody weeds. ROUNDUP® Ultra is degraded by micro-organisms in the soil.

INSTRUCTIONS FOR USE

FOR USE ONLY AS AN AMATEUR WEEDKILLER. READ ALL SAFETY INSTRUCTIONS BEFORE USE.

WHEN TO USE

• Apply as a foliar spray to weeds and saplings at any time when the weeds are actively growing and have adequate leaf area to absorb the spray. • Freshly cut tree stumps and standing trees should be treated from November to March, to avoid the period of active sap flow in spring/early summer. • Avoid spraying when rain is imminent. Rain within 6 hours of spraying may reduce effectiveness, so repeat treatment may be necessary. • Avoid spraying in windy conditions, as spray drift to lawns and other wanted plants will damage or destroy them. • Avoid all other spray contact with cultivated plants. If cultivated plants are treated by mistake, IMMEDIATELY AND THOROUGHLY wash off the weedkiller with ample water.

WHERE TO USE

• ROUNDUP® Ultra controls annual weeds and most perennial weeds and trees around the garden and on areas not intended to bear vegetation such as hard surfaces, patios, drives, tarmac, paths and gravel areas. It can be used to clean up weedy ground before planting vegetables, flowers, bushes and trees, and to renovate overgrown areas. Direct spray away from ponds and other surface water bodies. • DO NOT USE ON WANTED PLANTS. DO NOT USE ON AREAS OF LAWN UNLESS YOU WANT TO KILL IT. DO NOT USE UNDER POLYTHENE OR GLASS.

HOW TO USE

• Although not a requirement, as good practice, we recommend wearing waterproof gloves and gardening footwear. • Apply by sprayer to lightly wet the leaves. 1 litre is approximately 2 pints. 5 litres is approximately 1 gallon. When diluted in 1 litre of water as surface of about 30 m² can be treated. Do not apply through, or store in, galvanised or unlined steel sprayers. • Weeds show effects within 1-4 weeks. Dead or dying weeds can be dug in or composted without harming future plants.

ANNUAL AND PERENNIAL WEEDS (foliar applications)

| ROUNDUP® Ultra to be added to: Sprayer - 1 litre of water | Area treated | When to treat |
|--|---------------------------|--|
| Annual weeds: Chickweed, Speedwell, Annual Meadow Grass | 10 ml / 30 m ² | When actively growing, usually February - November |
| Perennial grasses: including Couch | 15 ml / 30 m ² | When actively growing, usually February - November |
| Tough perennial deep rooted and broad-leaved weeds: Bindweed, Dandelions, Docks, Ground Elder*, Thistles* | 15 ml / 30 m ² | Dandelions and Docks: when actively growing, usually April - October Bindweed, Ground Elder, Thistles: around the time of flowering |
| Areas not intended to bear vegetation | 15 ml / 30 m ² | When actively growing, usually February - November |
| Lawn destruction | 20 ml / 30 m ² | Treat in a period of active growth |

BRUSH WEEDS AND SAPLINGS (foliar applications)

| ROUNDUP® Ultra to be added to: Sprayer - 1 litre of water | Area treated | Best time of year to treat |
|--|---------------------------|---|
| Brush weeds: Brambles, Nettles, Horsetail*, Braken | 10 ml / 30 m ² | Brambles, Nettles, Scrub: June - September Horsetail, Braken: July - August Fully grown Nettles: cut back in early summer and treat regrowth in September |
| Rhododendron | 30 ml / 30 m ² | Cut back and treat re-growth in summer |
| Saplings: Beech, Sycamore, Oak, Hazel, Willow, Ash | 10 ml / 30 m ² | Treat June - August before leaf senescence |

*Some tough weeds (e.g. Horsetail, Ground Elder) may need a repeat treatment if regrowth appears.

HOW TO USE (continued)

LAWN DESTRUCTION

Apply ROUNDUP® Ultra to actively growing lawn before the onset of dormancy, usually between May and September. Allow at least 7-10 days for ROUNDUP® Ultra to be translocated to the roots of treated lawn. Remove dying and dead lawn. Either re-seed with grass seed or re-turf according to seed or turf providers instructions. ROUNDUP® Ultra should not be used on areas of lawn unless the user wants to kill them.

FRESHLY CUT TREE AND SHRUB STUMPS

Cut the tree or shrub stem close to the ground in November to March, and thoroughly treat the cut surface of the stump as soon as possible after felling. Use a paint brush to apply the diluted ROUNDUP® Ultra on to the cut stump. Ensure the whole cut surface is saturated, particularly around the edges and bark of the stump. Ensure the brush is thoroughly cleaned before and after use. Tree stump dilutions: 20% solution in water (e.g. a mix of 20 ml of ROUNDUP® Ultra and 80 ml water).

STANDING TREES

In November to March, use an axe to cut angled notches that completely penetrate the bark of standing trees. Cut at approximately knee height, one notch for trees up to 10 cm in diameter and use two or three notches in trees over 10 cm diameter. Using a ¾ or 1 inch standard paint brush, apply 2 ml (thorough wetting of the inside of the notch) per 10 cm trunk diameter of neat ROUNDUP® Ultra to each cut. Do not treat in the period of active sap flow in the spring/early summer. Users should be aware that dead standing trees are a potential hazard and therefore should be felled before they fall over.

JAPANESE KNOTWEED

Apply as a foliar spot application using a 2% solution (20 ml made up to 1 litre of water). For best results apply when the plant is flowering (usually August/September) but before the autumn dieback. Good coverage is essential. Spray the underside as well as the upper surface of the leaves. Repeat treatment may be necessary if regrowth appears. If Japanese Knotweed is growing amongst wanted plants apply 5-10 ml of a 20% (200ml ROUNDUP® Ultra made up to 1 litre of water) solution with water per stem using the following method: After mid August but before leaf fall, cut the stems of the plants approximately 200mm above the base of the cane and 40 mm above a node. Rupture the central stem tissue with a screwdriver and apply 5-10 ml of a 20% solution of ROUNDUP® Ultra into the hollow stem within 15 minutes of cutting using the 10 ml disposable pipette supplied with the pack. Gently dispense the pipette avoiding splash back. Stems must be larger than 8mm diameter.

RESTRICTIONS

- If not applied as a spot treatment, the maximum yearly dose must not exceed the dose indicated in the above crop tables.
- Do not walk or allow children and pets into treated areas until the product has dried on leaves to avoid transfer to lawns and other desired vegetation.
- **Maximum individual dose:** 1 per year. When applied via pipette the maximum concentration must not exceed 200 ml of product per 1 litre of water. When applied as a spray the maximum concentration must not exceed 20 ml of product per 1 litre of water. When used on areas not intended to bear vegetation the maximum dose must not exceed 32 ml/30 m². When applied by injection for chemical thinning of trees the maximum concentration must not exceed 2 ml product/10 cm of tree diameter. When applied to tree stumps the maximum concentration must not exceed 200 ml of product per 1 litre of water.

Replanting and sowing

| | |
|--|---|
| Light cover of annual weeds: | Replanting/sowing can commence the day after treatment |
| Dense cover, including perennial weeds: | Leave at least 7 days for the weedkiller to move to underground roots and shoots before digging or cultivating soil |

After application, rinse the sprayer three times, pouring rinse water over bare ground. Triple rinse the empty bottle and pour rinse water over bare ground.

FIRST AID

Eye contact: Immediately flush with plenty of water. If easy to do, remove contact lenses.
Skin contact: Take off contaminated clothing, wristwatch, jewellery. Wash clothes and clean shoes before re-use.
Inhalation: Remove to fresh air.
Ingestion: Immediately offer water to drink. Never give anything by mouth to an unconscious person. DO NOT induce vomiting unless directed by medical personnel. If symptoms occur, get medical attention.

MAPP No. 18850 PCS No. 04731

ROUNDUP® Ultra

kills most garden weeds with a single application. This product is a home garden weedkiller for use on unwanted vegetation including trees and freshly cut tree stumps and areas not intended to bear vegetation (e.g. weeds growing through all hard surfaces including drives, patios, paths, tarmac, gravel and paving).

INSTRUCTIONS FOR USE

FOR USE ONLY AS AN AMATEUR WEEDKILLER. READ ALL SAFETY INSTRUCTIONS BEFORE USE.

SAFETY INSTRUCTIONS

Protection during/in use: If swallowed, seek medical advice immediately and show this container or label. WASH HANDS AND EXPOSED SKIN AFTER USE. KEEP OFF SKIN. WASH OFF SPLASHES IMMEDIATELY.
Environmental protection: DO NOT CONTAMINATE WATER WITH PRODUCT OR ITS CONTAINER.
Storage and disposal: KEEP PRODUCT AWAY FROM CHILDREN AND PETS. KEEP AWAY FROM FOOD AND DRINK. KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed, in a safe place.

RISK & SAFETY INFORMATION

TO AVOID RISKS TO HUMAN HEALTH AND THE ENVIRONMENT, COMPLY WITH THE INSTRUCTIONS FOR USE.

- Read carefully and follow all instructions.
- Keep product away from food and drink.
- If medical advice is needed, have product container or label at hand.
- Keep product in original container.
- **For UK only:** Dispose of contents/container to a household waste recycling centre as hazardous waste except for empty containers which can be disposed of in the dustbin. Contact your local council for details.
- **For RoI only:** Dispose of contents/container to a household waste recycling centre as hazardous waste except for triple rinsed empty containers, which can be disposed of by recycling. Contact your local council for details.
